

Alexey (Alyosha) Petrov

Seattle, WA · (206)-861-6205 · alyoshapetrov@icloud.com · <https://www.linkedin.com/in/alexey-alyosha-petrov/>

EDUCATION

Arizona State University - Tempe, AZ

05/2027

Bachelor of Science - BS, Computer Science (GPA: 3.8)

Relevant Coursework: Data Structures and Algorithms, Object-Oriented Program & Data (Java), Discrete Math, Linear Algebra, Theoretical Computer Science, Database Management (PostgreSQL), Information Assurance (SQL, Python, Bash, C++, Assembly), Calculus I/II/III, Probability and Statistics, Programming Languages (C, C++, Scheme, Python, Java, Prolog, C#), Computer Organization and Assembly Language Programming Management and Strategy, Microeconomics

WORK EXPERIENCE

Qdeck.AI, Software Engineer Intern- Seattle, WA / Hybrid

05/2025 - 07/2025

- Built and maintained 9+ reusable React.js components with React Router v7 and Material UI, standardizing layouts and interactions across AI-driven financial dashboards to improve consistency and usability for end users
- Managed state with React hooks and Redux Toolkit, cutting unnecessary re-renders by 12% using client-side rendering
- Integrated REST APIs via Axios and async/await to streamline data flow between backend services and the frontend, cutting load times by 8%, enabling real-time portfolio refreshes without page reloads, ensuring reliable performance
- Wrote unit tests with Jest and React Testing Library to prevent UI regressions and strengthen reliability
- Collaborated in Agile sprints using Jira for task management and GitHub PR reviews for code quality, working with senior engineers to align on requirements, resolve merge conflicts, and adapt quickly to professional workflows

Research Intern Collective Logic Lab, Research Intern - Tempe, AZ

08/2024 - 01/2025

- Applied Python (pandas, scikit-learn, matplotlib) in Jupyter Notebook to analyze gene expression data, building predictive models, generating visualizations, and rapidly learning new bioinformatics tools to accelerate research
- Implemented and adapted the BoolODE package for Boolean model conversion and stochastic simulations, managing model definitions, initial conditions, and parameters to generate gene expression data and accelerate hypothesis testing
- Contributed code and results to GitHub (Collective Logic Lab), supporting collaboration and reproducibility

University of Washington SEAL Lab, IAC Intern - Seattle, WA

02/2023 - 07/2023

- Automated Google Sheets and CSV workflows, cutting intern onboarding time by 20% and increasing efficiency
 - Edited 10+ efficiency reports for industrial clients, adding structured data analysis and clear visual summaries to improve clarity, highlight actionable insights, and enhance overall report usefulness
 - Researched corporate laws and practices on tribal lands, synthesizing data-driven findings on environmental and legal issues into compliance recommendations that guided client decisions, strengthened organizational compliance strategies, and supported more sustainable business practices
-

PROJECTS

Personal Website, - Next.js, Tailwind CSS, Vercel

Present

- Learned Next.js rapidly and built a full-stack personal website with modular React components, responsive Tailwind CSS layouts, and integrated routing and state management to support future feature expansion
- Deployed on Vercel with CI/CD via GitHub integration, enabling automatic updates and reducing deployment time from hours to minutes for fast, reliable delivery of new features and content
- Designed a blog with dynamic routing to share CS/AI articles, demonstrating initiative in peer knowledge and technical writing

AI Text Reader, - Python, TensorFlow, MongoDB

11/2024

- Applied TensorFlow to build a handwritten text recognition model, gaining rapid proficiency in deep learning frameworks through designing, training, and testing neural networks to improve recognition performance
 - Designed a MongoDB database to store training data, improving recognition accuracy across test cases
 - Integrated real-time input APIs and Matplotlib visualizations, making the project interactive for peers during demos and group learning sessions
-

SKILLS & INTERESTS

Frontend: React.js, Next.js, React Router v7, Redux Toolkit, Material UI, Tailwind CSS, JavaScript/TypeScript, HTML/CSS

Backend / Data / ML: Python, Java, C++, SQL, PostgreSQL, TensorFlow, MongoDB, Pandas, NumPy, scikit-learn, Jupyter

Tools & Workflows: Git/GitHub, Jest, React Testing Library, Jira, Excel, Vercel CI/CD, Bash, Microsoft Teams

Interests: Hockey, Tennis, Weightlifting, Rock Climbing, Chess, Golf, Concerts, Traveling, Comedy, Video Games
